OIL AND GAS

ORION ATLANTIC LTD fully engages in the Oil & Gas Products. We are registered downstream Oil & Gas, Upstream, or exploration and production (E&P) company. In partnership with Oil Offshore Combination Limited (OOCL), Havilah Energy, we have positioned ourselves to explore, supply, drill and invest in oil and gas industry in Nigeria.

ORION ATLANTIC LIMITED is also a licensed downstream oil and gas company with a registered office in Nigeria. We specialize in the trading of petroleum products such as AGO, DPK and PMS with a vibrant marketing and distribution service network and we are positioned to serve recognized participants in the oil and gas industry nationwide.

Through our expertise and experience within the Nigerian Oil and Gas Industry, Orion is evolving to conclude and offer upstream operations and services such as marine support, equipment supply,

Onshore and offshore platforms supplies and services for indigenous oil companies and IOC's.

Our marketing and services are tailored to meet both domestic and international requirements in Nigeria and beyond, we are positioning ourselves to deliver the best premium products and services at very afford and competitive rates.

we have set the right operating strategy to enable us achieve consistent profits. We continually assess and evaluate the Nigerian downstream market to identify strategic opportunities.

The variety of environments and industry sectors in which we operate calls for constant vigilance and the anticipation of risks lie at the heart of our approach, regardless of the continents on which we operate.

The attention and understanding that ORION gives to its teams, its colleagues and to other parties represent a key factor for development of health and safety. All employees, permanent or temporary, are ambassadors for the company in their roles and responsibilities; their professional behaviour reflect the health and safety identity of ORION.

Our prevention approach strengthens the bonds of trust that unite us with our employees, partners and customers. It strengthens the appeal of ORION, contributes to its growth and forms part of its strategy.

JET A1 AVIATION FUEL SUPPLIES

ORION ATLANTIC LIMITED in partnership with Major Oil companies who have distinguished network of trusted suppliers. The different types of fuel. Jet A-1, TS1, JP8, AvGas, and so much more as we meet your fueling needs within the Nigeria Market.

LARGE UTILITY RENEWABLE ENERGY POWER PLANT

Unleashing the Power of Sustainable Energy: The Rise of Captive Solar Solutions Captive Solar Power

In an era where sustainability and energy independence are becoming paramount, the concept of captive solar power plants is gaining significant traction. Captive solar power plants offer businesses and large energy consumers a unique opportunity to harness the sun's energy directly, ensuring a reliable, cost-effective, and environmentally friendly power supply.

Understanding Captive Solar Power Plants

A captive solar power plant is a solar energy system designed to supply electricity primarily for the owner's use. Unlike traditional power plants that sell electricity to the grid, captive solar power plants are tailored to meet the specific energy needs of a single entity, such as a manufacturing facility, corporate office, or large commercial complex. These plants can be located on-site or at a remote location, connected to the consumer through a dedicated power transmission line.

The Benefits of Captive Solar Power Plants

Cost Efficiency: One of the most significant advantages of a captive solar power plant is the potential for substantial cost savings. By generating electricity on-site, businesses can reduce or eliminate their reliance on expensive grid power, leading to lower energy bills and enhanced financial predictability.

Energy Independence: Captive solar power plants provide energy independence, shielding businesses from the volatility of energy prices and supply disruptions. This stability is crucial for industries where uninterrupted power supply is vital for operations.

Environmental Impact: By investing in a captive solar power plant, businesses can significantly reduce their carbon footprint. Solar energy is a clean, renewable resource that produces no greenhouse gas emissions during operation, contributing to a healthier planet and supporting corporate sustainability goals.

Regulatory and Incentive Benefits: Governments worldwide are incentivizing the adoption of renewable energy through tax credits, rebates, and other financial benefits. Businesses can leverage these incentives to offset the initial investment in captive solar power plants, enhancing the return on investment.

Enhanced Corporate Image: Adopting captive solar solutions showcases a company's commitment to sustainability, boosting its corporate image and appealing to environmentally conscious consumers and investors.

Implementing Captive Solar Power Plants

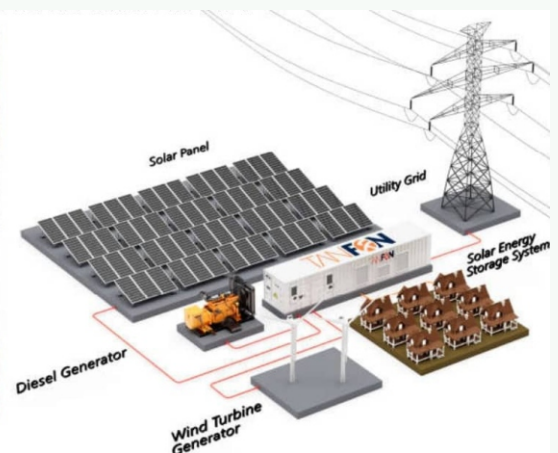

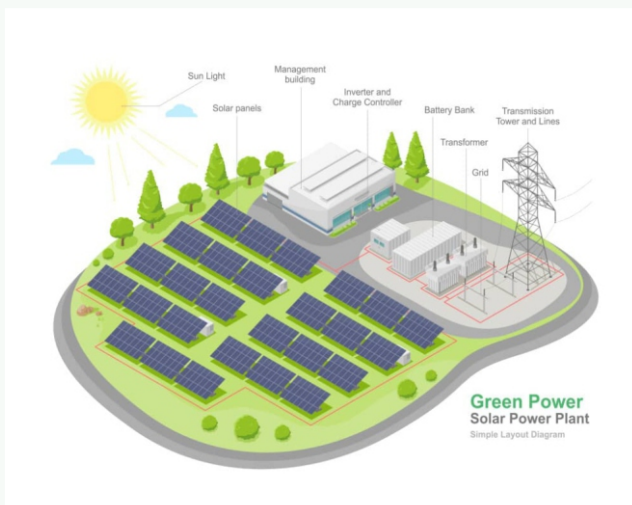

Assessment and Feasibility Study: The first step in implementing a captive solar power plant is conducting a comprehensive assessment and feasibility study. This involves evaluating the site's solar potential, energy consumption patterns, and the financial viability of the project. Expert consultants can provide valuable insights and recommendations during this phase.

Design and Engineering: Once the feasibility study confirms the project's viability, the next step is designing the captive solar power plant. This includes selecting the appropriate solar panels, inverters, mounting systems, and other components. The design should optimize energy production and ensure seamless integration with existing infrastructure.

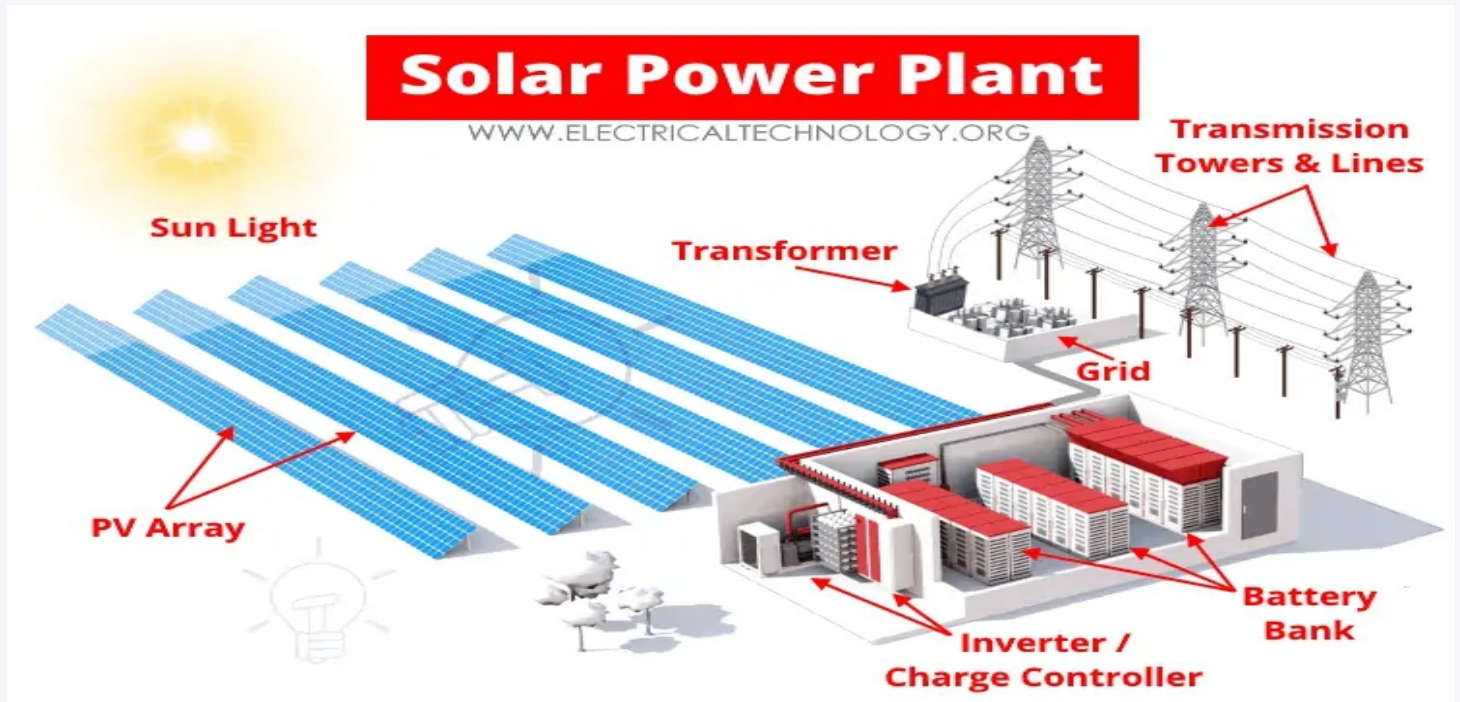

Financing Options: Financing a captive solar power plant can be achieved through various means, including outright purchase, solar loans, leasing arrangements, or power purchase agreements (PPAs). Each option has its advantages and should be carefully considered based on the business's financial strategy and goals.

Construction and Installation: The construction and installation phase involves setting up the solar panels, inverters, and other equipment, followed by connecting the system to the business's power infrastructure. This phase requires skilled professionals to ensure the installation is safe, efficient, and compliant with regulatory standards.

Monitoring and Maintenance: After installation, regular monitoring and maintenance are crucial to ensure the captive solar power plant operates at peak efficiency. Advanced monitoring systems can track performance in real-time, allowing for prompt detection and resolution of any issues.

LARGE UTILITY RENEWABLE ENERGY POWER PLANT

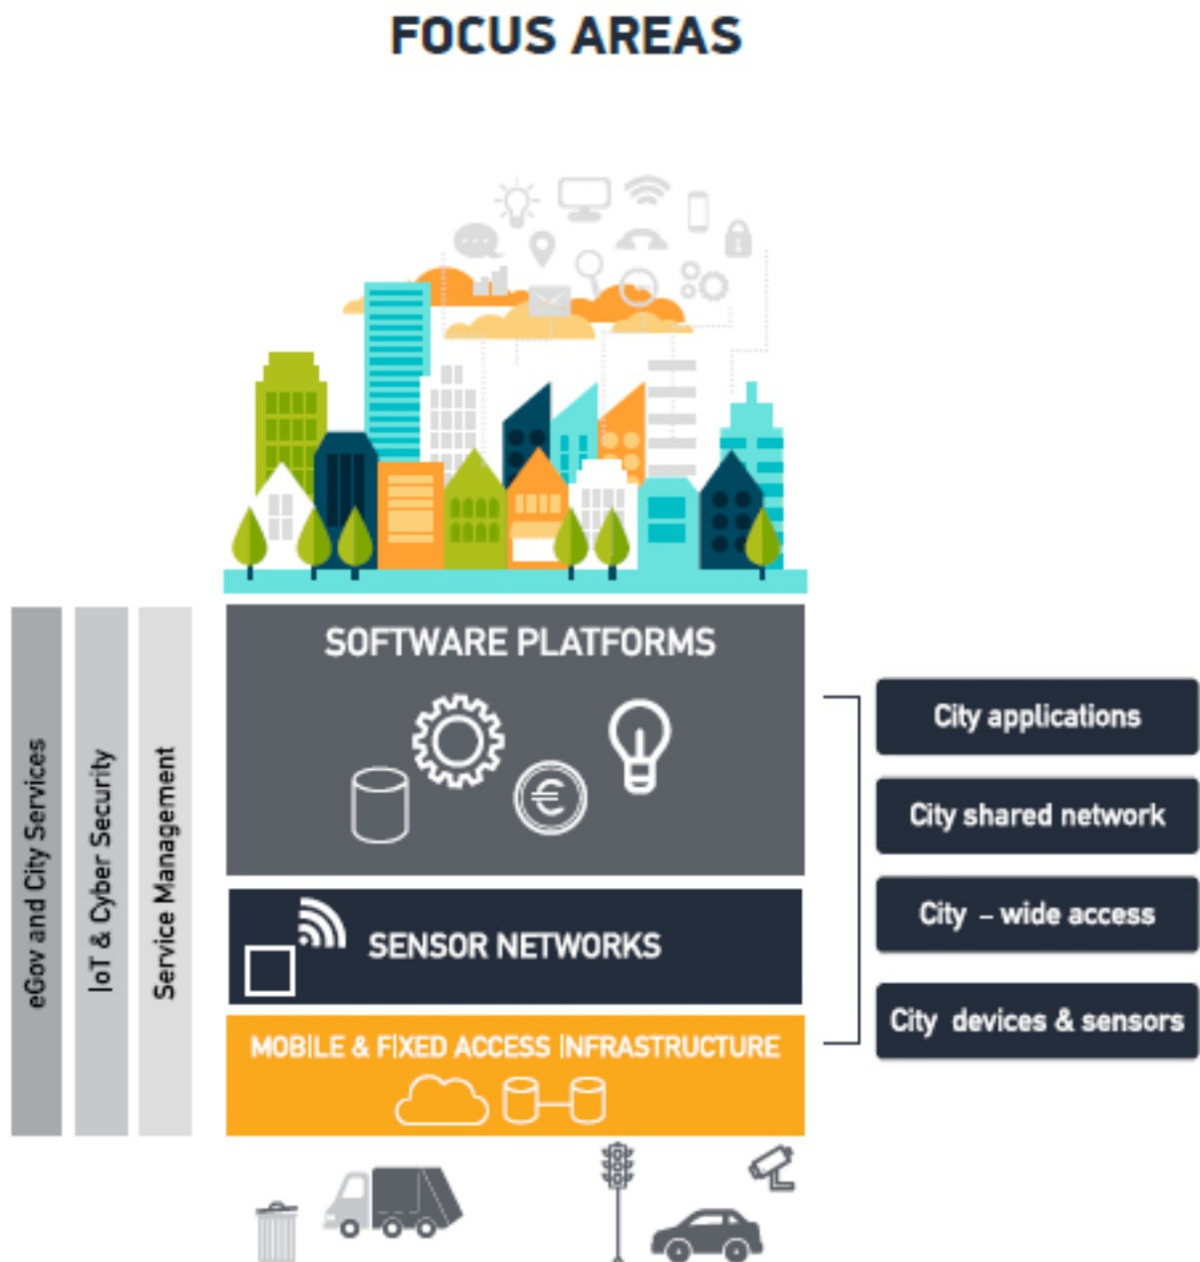

INFORMATION TECHNOLOGY

ORION ATLANTIC LTD in partnership with her sister companies - **CLEVELAND ORION**, Xchange Box Solutions and **KAD ICT HUB** have been solving clients' real world ICT issues with quality of service and sound technology. Having been intimately involved with State governments and Commercial large-scale enterprise computing, we are your one-stop provider of data processing system/process design, development, implementation, management, evaluation and certification.

INFORMATION TECHNOLOGY

ORION ATLANTIC LIMITED in partnership with her sister company **CLEVELAND ORION LIMITED**, Asseco Software Nigeria Limited and **KADICT HUB** provides diverse services in the Information and Communications. Orion Atlantic Limited has over the years successfully implemented wide range of versatile projects within the broader Information and Communications Technology (ICT) and research.

The services includes and not limited to the following:

- Electronic Tax Tracking Payment Systems (ETTPS)
- E-governance
- E-health
- Computer Training Services for organizations
- Sales and Supplies and
- General Maintenance

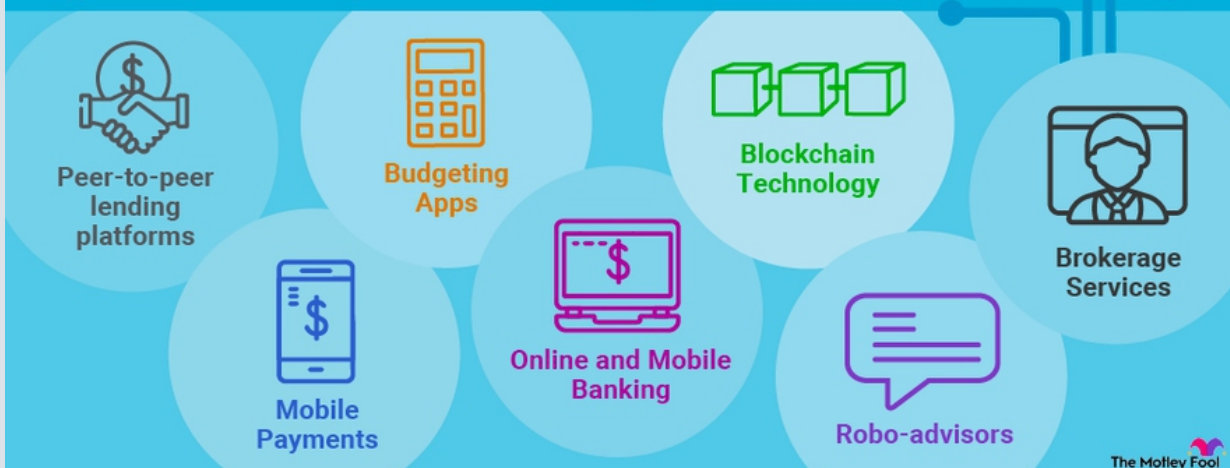

INFORMATION TECHNOLOGY

ORION ATLANTIC uses Financial technology (better known as fintech) to seeks to improve and automate the delivery and use of financial services. Our expert of fintech has helped companies, business owners, and consumers better manage their financial operations, processes, and lives

THE FINTECH INDUSTRY

Fintech covers a wide range of applications, from digital wallets and cryptocurrencies to fraud protection and new loan processes.
